

RENDIMENSION

LinkedIn Advertising Landscape Analysis

Complement to the Facebook/Instagram Master Decision Report

Date: March 17, 2026 | **Market:** United States (National) | **Platform:** LinkedIn

Status: LinkedIn Intelligence Complete

PURPOSE: This document analyzes LinkedIn as a separate advertising channel for Rendimension. LinkedIn reaches decision-makers (developers, VPs, C-suite) directly by job title — a targeting capability Facebook cannot match. This analysis covers: LinkedIn Ad Library audit, platform benchmarks, ad format recommendations, targeting strategy, and GO/AVOID verdicts per service.

TABLE OF CONTENTS

1. Executive Summary — LinkedIn Verdict
2. LinkedIn vs Facebook: Why Both Matter
3. LinkedIn Ad Library Audit (7 Searches)
4. Competitor Analysis on LinkedIn
5. LinkedIn B2B Benchmarks 2026
6. LinkedIn Targeting Strategy for Rendimension
7. LinkedIn Ad Formats & Recommendations
8. Service Decision Matrix — LinkedIn Specific
9. LinkedIn Campaign Architecture
10. Final Recommendations & Next Steps

1. EXECUTIVE SUMMARY

LinkedIn is an even bigger blue ocean than Facebook for Rendimension. Across 7 LinkedIn Ad Library searches covering all of Rendimension's service categories, we found **fewer than 8 direct archviz competitors** running LinkedIn ads — and most of them are running generic portfolio-style ads with zero business outcome framing.

The opportunity is massive: LinkedIn lets you target by job title (VP of Development, Director of Construction, Real Estate Investment Manager) — the exact decision-makers who approve \$15K–\$50K visualization budgets. **Nobody is doing this.**

30-Second Verdict: LinkedIn should be Rendimension's **secondary channel** (after Meta), focused exclusively on high-ticket services targeting C-suite and VP-level decision-makers. The CPL will be higher (\$60–\$150 vs \$30–\$80 on Meta), but lead quality will be significantly better. Start with 2 campaigns: one targeting developers/investors, one targeting architects at large firms.

2. LINKEDIN VS FACEBOOK: WHY BOTH MATTER

Dimension	Facebook/Instagram	LinkedIn
Audience Type	Broad — interests, behaviors, lookalikes	Precise — job title, company size, industry, seniority
Decision-Maker Access	Indirect — may reach employees, not buyers	Direct — target VP, Director, C-suite by title
Cost Per Lead	\$30–\$80 (estimated for archviz)	\$60–\$150 (B2B services average)
Lead Quality	Mixed — needs qualification	High — pre-qualified by job title
Best For	Volume, awareness, retargeting, visual showcase	High-ticket leads, thought leadership, B2B credibility
Ad Competition (Archviz)	Low (10-50 results per search)	Near Zero (0-5 direct competitors)
Content Tone	Visual, emotional, scroll-stopping	Professional, credibility-driven, data-backed
Lead Gen Forms	Available (lower conversion)	Native Lead Gen Forms (15-20% conversion rate)

Strategic Takeaway: Facebook generates VOLUME. LinkedIn generates QUALITY. Use both: Facebook for awareness and retargeting broad audiences, LinkedIn for surgically reaching the person who signs the check.

3. LINKEDIN AD LIBRARY AUDIT

We searched 7 service-related terms in the LinkedIn Ad Library to map the competitive landscape. Unlike Facebook's Ad Library (which shows all active ads with filters), LinkedIn's Ad Library searches by keyword across all promoted content. Results include both direct competitors and noise.

Search Term	Total Results	Direct Archviz Competitors	Signal
architectural visualization	3,519	~5	LOW — mostly noise
3D rendering	3,043	~4	LOW — software/hardware ads dominate
pre construction rendering	24	0	"BLUE OCEAN"
real estate rendering	285	~3	VERY LOW
virtual walkthrough construction	9	0	"BLUE OCEAN"
commercial space visualization	416	0	"BLUE OCEAN"
investor presentation real estate	584	0	"BLUE OCEAN"

Key Finding: 4 out of 7 searches returned ZERO direct archviz competitors. The high-value service categories (pre-construction, virtual walkthrough, commercial viz, investor presentations) are completely uncontested on LinkedIn. This is the widest blue ocean we've seen across any platform.

4. COMPETITOR ANALYSIS ON LINKEDIN

Only 7-8 companies worldwide are actively advertising archviz services on LinkedIn. Here is every direct competitor we found:

Company	Ad Type	Messaging	Threat Level
Javier Wainstein / Just With Renders	Multiple single-image ads (most prolific)	Generic portfolio: "develops 3D visualization for architecture and interior design"	LOW
DESIGNS HUB LLC	Video ads, luxury villa focus	"A villa is not simply built - it is envisioned" — aspirational but generic	LOW
Mare Visuals	Before/after visuals, branded "Project Presence"	Investment value framing (+20%) — closest to business outcome language	MEDIUM
3D Lines Design LTD	Single image with strong copy	"CGI Visuals That Sell Homes Before They're Built" — BEST business framing on LinkedIn	MEDIUM
R3D Architectural Visualisation	Single image, price competition	"Let us beat your quote for 3D renders" — race-to-bottom positioning	LOW
ZOA Studio	Animation/video focus	"Trusted animation studio for visionary global projects" — premium but vague	LOW
OgdenXR	Single image, proposal-focused	"Walk through the project before it's built — that's how you win" — good framing	MEDIUM

What Every Competitor Gets Wrong on LinkedIn

- Portfolio-first approach — showing pretty buildings instead of business results
- No job-title-specific messaging — same ad for architects and developers
- No thought leadership — zero document ads, zero educational content
- No Lead Gen Forms — all drive to external websites (losing 50%+ of conversions)
- Personal profiles running ads (Javier Wainstein) instead of company pages — limits scale
- No retargeting strategy — one-touch ads with no follow-up sequence

Rendimension's Edge: If you run LinkedIn ads with business outcome framing, Lead Gen Forms, thought leadership content, and job-title targeting, you will be the **ONLY** archviz company doing this. First-mover advantage is massive.

5. LINKEDIN B2B BENCHMARKS 2026

These benchmarks are based on 2025-2026 B2B advertising data across LinkedIn. Archviz is a niche B2B service, so expect results between the general B2B average and the professional services category.

Metric	LinkedIn B2B Average	Rendimension Target	Context
CPC (Cost Per Click)	\$5.50 – \$8.50	< \$8.00	Higher than Meta (\$1-3) but leads are pre-qualified by job title
CTR (Click-Through Rate)	0.44% – 0.65%	> 0.5%	Lower than Meta (1-2%) — normal for LinkedIn. Visual archviz content may outperform.
CPL (Cost Per Lead)	\$60 – \$150+	< \$150	At \$15K+ project value, even \$150/lead is <1% cost of sale — excellent ROI
Lead Gen Form Conv. Rate	15% – 20%	> 15%	LinkedIn native forms auto-fill from profile — 3-5x higher than landing pages
Engagement Rate (Organic)	2% – 4%	> 3%	Visual content (renders) typically gets above-average engagement on LinkedIn

Rendimension LinkedIn Traffic Light System

Metric	GREEN (Keep Running)	YELLOW (Monitor)	RED (Action Required)
CTR	> 0.5%	0.3% – 0.5%	< 0.3%
CPC	< \$8	\$8 – \$15	> \$15
CPL	< \$150	\$150 – \$250	> \$250

6. LINKEDIN TARGETING STRATEGY

LinkedIn's killer advantage is targeting by job title, company size, and industry. Here is the targeting architecture for each of Rendimension's client types:

Audience 1: Real Estate Developers & Investors

Parameter	Targeting
Job Titles	VP of Development, Director of Development, Real Estate Developer, Chief Development Officer, Managing Director (Real Estate), Investment Manager, VP of Acquisitions, Development Manager
Industries	Real Estate, Construction, Real Estate Investment, Hospitality, Commercial Real Estate
Company Size	11-200 employees (mid-size developers), 201-1000 (large developers), 1001+ (institutional)
Seniority	Director, VP, C-Suite, Owner/Partner
Geography	United States (national)
Est. Audience Size	50,000 – 120,000 members

Audience 2: Architects at Large Firms

Parameter	Targeting
Job Titles	Principal Architect, Design Director, Studio Director, Project Architect, Senior Architect, Architecture Director, Head of Design
Industries	Architecture & Planning, Design, Civil Engineering
Company Size	51-200 (mid-size firms), 201-1000 (large firms), 1001+ (enterprise firms like Gensler, HKS)
Seniority	Senior, Director, VP, C-Suite, Owner/Partner
Geography	United States (national)
Est. Audience Size	30,000 – 80,000 members

Audience 3: Retail & Hospitality Expansion Leads

Parameter	Targeting
Job Titles	VP of Store Development, Director of Real Estate, VP of Facilities, Director of Construction, Head of Expansion, Store Planning Manager, VP of Design & Construction

Parameter	Targeting
Industries	Retail, Hospitality, Food & Beverages, Leisure/Travel, Restaurants
Company Size	201-1000, 1001-5000, 5001+ (chains expanding nationally)
Seniority	Director, VP, C-Suite
Geography	United States (national)
Est. Audience Size	15,000 – 40,000 members

7. LINKEDIN AD FORMATS & RECOMMENDATIONS

Format	Best For	Renderdimension Use Case	Priority
Document Ad (Carousel PDF)	Education, thought leadership, multi-step storytelling	"5 Questions to Ask Before Hiring a Visualization Studio" — positions as expert, captures leads mid-scroll	HIGH
Single Image + Lead Gen Form	Direct lead capture, quick conversion	Stunning render + "Get a Project Assessment" — auto-fills from LinkedIn profile	HIGH
Video Ad	Storytelling, walkthroughs, process showcase	30-60s walkthrough video: "From blueprint to boardroom-ready in 10 days"	HIGH
Thought Leader Ad (Personal Profile)	Credibility, authenticity, engagement	Hugo posting about project insights, promoted to target audience — feels organic	MEDIUM
Carousel Ad	Before/after, project showcase, process steps	Before (blueprint) > During (render process) > After (sold-out development)	MEDIUM
Message Ad (InMail)	Direct outreach to specific decision-makers	Personalized message to VPs of Development: "I noticed your new project in [city]..."	LOW

Format Strategy: Lead with Document Ads (thought leadership) and Single Image + Lead Gen Forms (direct conversion). This combination builds credibility AND captures leads simultaneously. No competitor is using Document Ads for archviz on LinkedIn — this is your format blue ocean.

8. SERVICE DECISION MATRIX — LINKEDIN SPECIFIC

LinkedIn-specific GO/AVOID verdicts based on Ad Library competition, targeting viability, and audience match on the platform:

Service	LinkedIn Competition	Target Audience on LI	Verdict	Rationale
Pre-Construction Sales Visualization	ZERO	Developers, VPs	GO	0 competitors + perfect audience match. #1 priority.
Investor Presentation Packages	ZERO	Investment Managers, Developers	GO	0 competitors. LinkedIn is WHERE investors live. Natural fit.
VR Walkthrough (Construction Verification)	ZERO	Directors of Construction, PMs	GO	9 total results, 0 direct. Decision-makers are on LinkedIn.
Commercial/Retail Space Viz	ZERO	VPs of Store Dev, Expansion Dirs	GO	Retail chains have LI presence. Target expansion teams.
Hospitality/Resort Visualization	NEAR ZERO	Hospitality Dev Directors	GO	Niche audience but high-ticket. Worth testing.
Architectural Rendering (Generic)	~5 competitors	Architects at large firms	TEST	Some competition exists. Only do with segment-specific copy.
Interior Design Rendering	LOW	Interior designers (small firms)	AVOID	Low ticket, designers less active on LI. Better on Instagram.
Commodity 3D Rendering	~4 competitors	Broad/unqualified	AVOID	Price competition. R3D already racing to bottom. Not worth LI spend.

9. LINKEDIN CAMPAIGN ARCHITECTURE

Recommended Campaign Structure (Phase 1 Launch)

Campaign 1: Developer/Investor Lead Gen

- Objective: Lead Generation (Lead Gen Forms)
- Audience: Developers + Investors (Audience 1 targeting)
- Budget: \$30-50/day (\$900-1,500/month)
- Ad Set A: Document Ad — '5 Ways Visualization Accelerates Real Estate Sales'
- Ad Set B: Single Image + Lead Gen Form — Hero render + 'Get Your Project Assessment'
- Ad Set C: Video — 30s walkthrough transformation
- KPI Target: CPL < \$150, CTR > 0.5%

Campaign 2: Architect Thought Leadership

- Objective: Lead Generation + Brand Awareness
- Audience: Senior Architects at large firms (Audience 2 targeting)
- Budget: \$20-30/day (\$600-900/month)
- Ad Set A: Thought Leader Ad — Hugo's post about project insights
- Ad Set B: Document Ad — 'Why Your Presentation Renders Are Losing You Projects'
- Ad Set C: Carousel — Before (flat drawing) > After (photorealistic render)
- KPI Target: CPL < \$120, Engagement Rate > 3%

Campaign 3: Retail/Hospitality Expansion (Phase 2)

- Objective: Lead Generation
- Audience: Retail/Hospitality expansion teams (Audience 3 targeting)
- Budget: \$20-30/day (\$600-900/month)
- Launch after Campaigns 1&2 prove the model (4-6 weeks later)
- Ad Set A: Single Image — 'See Your New Location Before Breaking Ground'
- Ad Set B: Video — Retail store visualization walkthrough
- KPI Target: CPL < \$200 (niche audience, higher expected CPL)

Total LinkedIn Budget (Phase 1): \$1,500-2,400/month across 2 campaigns. This is a test budget to validate the channel before scaling. If CPL meets targets within 30 days, increase to \$3,000-4,000/month.

10. FINAL RECOMMENDATIONS & NEXT STEPS

Top 3 LinkedIn Priorities

1. Launch Developer/Investor Campaign First — This is the highest-ticket audience (\$15K-\$50K projects) with zero competitors on LinkedIn. Use Lead Gen Forms + Document Ads. Expected ROI: even at \$150/lead, one closed deal (\$20K) pays for 4+ months of ad spend.

2. Create 3 Document Ads (LinkedIn Carousels) — Nobody in archviz is using this format. Topics: '5 Ways Visualization Accelerates Sales', 'The Real Cost of Cheap Renders', 'How Smart Developers Pre-Sell 60% Before Breaking Ground'. These build credibility AND capture leads.

3. Set Up Hugo as Thought Leader — Thought Leader Ads (promoted personal posts) get 2-3x higher engagement than company page ads. Hugo posts about real projects, insights from 1,000+ projects, and industry observations. LinkedIn promotes them to target audiences.

What NOT To Do on LinkedIn

- Do NOT advertise generic '3D rendering services' — 4 competitors already doing this badly
- Do NOT use portfolio-only ads — every competitor does this. LinkedIn audience wants business value.
- Do NOT send traffic to external landing pages — use Lead Gen Forms (3-5x higher conversion)
- Do NOT target 'architects' broadly — target by seniority + firm size to avoid junior/freelance leads
- Do NOT copy Facebook ad creative — LinkedIn requires professional tone, not scroll-stopping visuals

Phased Action Plan

Phase	Timeline	Actions
Phase 1: Setup	Week 1-2	Install LinkedIn Insight Tag, create Lead Gen Forms, produce 3 Document Ads + 3 Single Image ads, set up Campaign Manager
Phase 2: Launch	Week 3	Launch Campaign 1 (Developers) + Campaign 2 (Architects) with \$50-80/day combined budget
Phase 3: Learn	Week 3-6	7-day learning period (hands off), then monitor. Kill ads with CTR < 0.3% after 5K impressions. Scale winners by 20%.
Phase 4: Optimize	Week 7-10	Analyze CPL by audience segment. Double down on winning audience. Create 3 new ad variants. Launch Campaign 3 (Retail/Hospitality) if Phase 1 profitable.
Phase 5: Scale	Month 3+	If CPL < \$150 sustained: increase budget to \$3-4K/month. Add retargeting campaign for website visitors. Test Message Ads (InMail) for high-value prospects.

BOTTOM LINE: LinkedIn is Rendimension's untapped goldmine for high-ticket B2B leads. The competition is essentially zero in the service categories that matter most. With the right targeting (job title + seniority) and format (Document Ads + Lead Gen Forms), Rendimension can own this channel before anyone else wakes up.
